Subject Index of Volume 162

Adsorption
  adsorption of spin labeled polymers on carbon fibers for composite interface studies, 229
Alloys
  improving mechanical properties of Nextel 610 reinforced Al-224 alloy through θ phase precipitation at the fiber–matrix interface, 135
  nitridation of niobium alloys: interface effects, 123
Alumina
  interface engineering in alumina/glass composites, 35
Aluminium
  formation of TiC in *in situ* processed composites via solid–gas, solid–liquid and liquid–gas reaction in molten Al–Ti, 153
  improving mechanical properties of Nextel 610 reinforced Al-224 alloy through θ phase precipitation at the fiber–matrix interface, 135
  interfacial reactions of thin titanium aluminide films with Al_2O_3 film sapphire, 107
  strength and toughness of carbon fiber reinforced aluminium matrix composites, 143
Anisotropic surfaces
  equilibrium geometries of anisotropic surfaces and interfaces, 83

Bimaterials
  elastic–plastic analysis of cracks on bimaterial interfaces: interfaces with structure, 175
Bis(vinylbenzyl)ether
  bis(vinylbenzyl)ether and bis(vinylbenzyl)thioether: synthesis, cure studies and evaluation of carbon fiber composites, 215
Bis(vinylbenzyl)thioether
  bis(vinylbenzyl)ether and bis(vinylbenzyl)thioether: synthesis, cure studies and evaluation of carbon fiber composites, 215

Carbides
  carbon-layer formation at silicon-carbide–glass interfaces, 45
Carbon
  adsorption of spin labeled polymers on carbon fibers for composite interface studies, 229
  bis(vinylbenzyl)ether and bis(vinylbenzyl)thioether: synthesis, cure studies and evaluation of carbon fiber composites, 215
  carbon-layer formation at silicon-carbide–glass interfaces, 45
  formation of TiC in *in situ* processed composites via solid–gas, solid–liquid and liquid–gas reaction in molten Al–Ti, 153
  strength and toughness of carbon fiber reinforced aluminium matrix composites, 143
Ceramics
  fluoromica coated Nicalon fiber reinforced glass–ceramic composites, 27
  interfacial studies of refractory glass–ceramic-matrix/advanced-SiC-fiber-reinforced composites, 53
  the fracture resistance of metal–ceramic interfaces, 1
  the influence of crystallography and oxide and metallic types on the structure and properties of metal–ceramic interfaces, 97
Composites
  adsorption of spin labeled polymers on carbon fibers for composite interface studies, 229
  bis(vinylbenzyl)ether and bis(vinylbenzyl)thioether: synthesis, cure studies and evaluation of carbon fiber composites, 215
  creep behavior of an SiC-reinforced XD™ $MoSi_2$ composite, 73
  determination of interphase properties of fiber composites from phase velocities of ultrasound, 193
  effects of water on the interface in a model polymer composite system: a nuclear magnetic resonance study, 249
  fluorescence characterization of cure and water uptake in polymers and composites, 241
  fluoromica coated Nicalon fiber reinforced glass-ceramic composites, 27
  formation of TiC in *in situ* processed composites via solid–gas, solid–liquid and liquid–gas reaction in molten Al–Ti, 153
  functional interfaces for oxide–oxide composites, 15
  interface engineering in alumina/glass composites, 35
  interfaces in cast metal–matrix composites, 163
  interfacial studies of refractory glass–ceramic–matrix/advanced-SiC-fiber-reinforced composites, 53
  inverse organic–inorganic composite materials: high glass content non-shrinking sol-gel composites, 257
  strength and toughness of carbon fiber reinforced aluminium matrix composites, 143
  synthesis and characterizatin of spin labeled polymers for composite interface studies, 233
Copper
  temperature programmed desorption studies of the copper–sapphire(0001) system, 131
Cracking
  elastic–plastic analysis of cracks on bimaterial interfaces: interfaces with structure, 175
Creep
  creep behavior of an SiC-reinforced XD™ $MoSi_2$ composite, 73
Crystallography
  the influence of crystallography and oxide and metallic types on the structure and properties of metal–ceramic interfaces, 97

Desorption
  temperature programmed desorption studies of the copper–sapphire(0001) system, 131
Dynamic nuclear polarization
  dynamic nuclear polarization enhanced nuclear magnetic resonance of polymer-blend interfaces, 221

Elasticity
  elastic–plastic analysis of cracks on bimaterial interfaces: interfaces with structure, 175

Fibre reinforcement
  creep behavior of an SiC-reinforced XD™ $MoSi_2$ composite, 73

fluoromica coated Nicalon fiber reinforced glass–ceramic composites, 27
interfacial studies of refractory glass–ceramic–matrix/advanced-SiC-fiber-reinforced composites, 53
strength and toughness of carbon fiber reinforced aluminium matrix composites, 143
Fibres
adsorption of spin labeled polymers on carbon fibers for composite interface studies, 229
bis(vinylbenzyl)ether and bis(vinylbenzyl)thioether: synthesis, cure studies and evaluation of carbon fiber composites, 215
determination of interphase properties of fiber composites from phase velocities of ultrasound, 193
improving mechanical properties of Nextel 610 reinforced Al-224 alloy through θ phase precipitation at the fiber–matrix interface, 135
Fluorescence
fluorescence characterization of cure and water uptake in polymers and composites, 241
Fluoromica coatings
fluoromica coated Nicalon fiber reinforced glass–ceramic composites, 27
Fracture
fracture mechanics of dissimilar materials bonded through an orthotropic interfacial zone, 199
the fracture resistance of metal–ceramic interfaces, 1

Glass
carbon-layer formation at silicon-carbide–glass interfaces, 45
fluoromica coated Nicalon fiber reinforced glass–ceramic composites, 27
interface engineering in alumina/glass composites, 35
interfacial studies of refractory glass–ceramic–matrix/advanced-SiC-fiber-reinforced composites, 53
inverse organic–inorganic composite materials: high glass content non-shrinking sol-gel composites, 257

Inorganic materials
inverse organic–inorganic composite materials: high glass content non-shrinking sol-gel composites, 257
Interfaces
adsorption of spin labeled polymers on carbon fibers for composite interface studies, 229
carbon-layer formation at silicon-carbide–glass interfaces, 45
determination of interphase properties of fiber composites from phase velocities of ultrasound, 193
dynamic nuclear polarization enhanced nuclear magnetic resonance of polymer-blend interfaces, 221
effects of water on the interface in a model polymer composite system: a nuclear magnetic resonance study, 249
elastic–plastic analysis of cracks on bimaterial interfaces: interfaces with structure, 175
equilibrium geometries of anisotropic surfaces and interfaces, 83
fracture mechanics of dissimilar materials bonded through an orthotropic interfacial zone, 199
functional interfaces for oxide–oxide composites, 15
improving mechanical properties of Nextel 610 reinforced Al-224 alloy through θ phase precipitation at the fiber–matrix interface, 135
interface engineering in alumina/glass composites, 35
interfaces in cast metal–matrix composites, 163
interfacial reactions of thin titanium aluminide films with Al_2O_3 film sapphire, 107
interfacial studies of refractory glass–ceramic–matrix/advanced-SiC-fiber-reinforced composites, 53
nitridation of niobium alloys: interface effects, 123
synthesis and characterization of spin labeled polymers for composite interface studies, 233
the fracture resistance of metal–ceramic interfaces, 1
the influence of crystallography and oxide and metallic types on the structure and properties of metal–ceramic interfaces, 97
the use of superlattices to probe and control reactions at buried interfaces, 115

Layer formation
carbon-layer formation at silicon-carbide–glass interfaces, 45

Matrices
improving mechanical properties of Nextel 610 reinforced Al-224 alloy through θ phase precipitation at the fiber–matrix interface, 135
interfaces in cast metal–matrix composites, 163
Mechanical properties
improving mechanical properties of Nextel 610 reinforced Al-224 alloy through θ phase precipitation at the fiber–matrix interface, 135
Metals
interfaces in cast metal–matrix composites, 163
the fracture resistance of metal–ceramic interfaces, 1
the influence of crystallography and oxide and metallic types on the structure and properties of metal–ceramic interfaces, 97
Molybdenum
creep behavior of an SiC-reinforced XD™ $MoSi_2$ composite, 73

Nicalon fibres
fluoromica coated Nicalon fiber reinforced glass–ceramic composites, 27
Niobium
nitridation of niobium alloys: interface effects, 123
Nitriding
nitridation of niobium alloys: interface effects, 123
Nuclear magnetic resonance
dynamic nuclear polarization enhanced nuclear magnetic resonance of polymer-blend interfaces, 221
effects of water on the interface in a model polymer composite system: a nuclear magnetic resonance study, 249

Organic materials
inverse organic–inorganic composite materials: high glass content non-shrinking sol-gel composites, 257
Orthotropic zones
fracture mechanics of dissimilar materials bonded through an orthotropic interfacial zone, 199
Oxides
functional interfaces for oxide–oxide composites, 15
the influence of crystallography and oxide and metallic types on the structure and properties of metal–ceramic interfaces, 97
Oxygen
interfacial reactions of thin titanium aluminide films with Al_2O_3 film sapphire, 107

Phase velocities
determination of interphase properties of fiber composites from phase velocities of ultrasound, 193
Plasticity
elastic–plastic analysis of cracks on bimaterial interfaces: interfaces with structure, 175

Polymers
adsorption of spin labeled polymers on carbon fibers for composite interface studies, 229
dynamic nuclear polarization enhanced nuclear magnetic resonance of polymer-blend interfaces, 221
effects of water on the interface in a model polymer composite system: a nuclear magnetic resonance study, 249
fluorescence characterization of cure and water uptake in polymers and composites, 241
synthesis and characterization of spin labeled polymers for composite interface studies, 233

Resistance
the fracture resistance of metal–ceramic interfaces, 1

Sapphire
interfacial reactions of thin titanium aluminide films with Al_2O_3 film sapphire, 107
temperature programmed desorption studies of the copper–sapphire(0001) system, 131
Silicon
carbon-layer formation at silicon-carbide–glass interfaces, 45
creep behavior of an SiC-reinforced XD™ $MoSi_2$ composite, 73

Silicon carbide
creep behavior of an SiC-reinforced XD™ $MoSi_2$ composite, 73
interfacial studies of refractory glass–ceramic–matrix/advanced-SiC-fiber-reinforced composites, 53
Sol-gel processes
inverse organic–inorganic composite materials: high glass content non-shrinking sol-gel composites, 257
Superlattices
the use of superlattices to probe and control reactions at buried interfaces, 115

Thin films
interfacial reactions of thin titanium aluminide films with Al_2O_3 film sapphire, 107
Titanium
formation of TiC in *in situ* processed composites via solid–gas, solid–liquid and liquid–gas reaction in molten Al–Ti, 153
interfacial reactions of thin titanium aluminide films with Al_2O_3 film sapphire, 107

Water
effects of water on the interface in a model polymer composite system: a nuclear magnetic resonance study, 249
